A-M-KING

CONTENTS

A M King provides fully integrated Design-Build services for growing food and manufacturing companies, guiding them from project conception to completion.

About Us

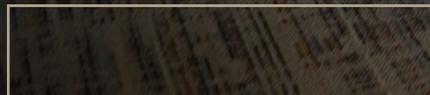

The A M King story began in 2004 when its founders set out to create a company offering the highest quality Design-Build services to select clients. Through the years, we've expanded service offerings beyond design and construction to include property consulting and facility services, while narrowing focus on the niche markets of food processing, food distribution and industrial manufacturing. Today, A M King is an award-winning, employee-owned company that performs turnkey services for clients nationwide, with a focus on quality, customer service and innovative solutions.

Process & Testimonials

Design. Build. Better. is more than a motto, it's how we do business. Continue reading to see what our clients think about the A M King approach.

HOW WE DESIGN. BUILD. BETTER.

A M King was founded 20 years ago on Design-Build best practices, and we've continued to use them as a means to better serve our clients.

We manage projects under a single contract from the property consulting stage, through design and construction and when the project is complete, furnish ongoing facility services.

“As we looked to expand and build out our Savannah facility, we wanted an experienced design partner who could also execute and manage the plan. A M King was the perfect choice for us.”

Mark Moore / Co-Founder and CEO / MANA Nutrition

“This new building is intended to invite collaboration through its open spaces, encouraging employees to connect and work together effectively. We believe these enhanced amenities will help our team feel right at home.”

Brian Holcombe / Director of National Services Facilities / ALDI US

“A M King’s experience and expertise in food related processing and warehousing ensured a facility built to food standards that would have no problem passing SQF audits. This facility provides additional capacity to service the U.S. market and support fast growing regions around the world.”

Luke Bolding / Director of Manufacturing / MÜNZING North America

“I have worked with dozens of Design-Build and construction firms over the years, and I can honestly say that A M King is one of the finest. There is no doubt they will design and construct a first-class distribution center for us in Florence, which will strengthen our ability to serve Southeast Atlantic coastal customers.”

Warren Newell / Director of Development / Cheney Brothers, Inc.

Branding

A M King has grown over the years by consistently providing high quality services for a variety of project types and locations. Our brand consistently represents our company, our culture and the superior standards we deliver. We maintain a heightened recognition and identification throughout our industry, among our customer base and in our communities.

THE A M KING LOGO

A M King Logo Artwork Files

Please contact Sarah Smith at communications@amkinggroup.com.

The A M King Logo

The A M King signature is the combination of the A M King logo symbol and the A M King specific logotype. Together they create the A M King signature.

Logo Usage

The logo may only appear in the proper black and sandstone colors, all black or reversed out in white. The logo and the colors are never to be drawn or otherwise altered.

Logo Specifications

The logotype should not be compromised in any way.

Full color

The logo is specified with the same two appropriate PMS colors. In four color process printing, the corporate PMS colors may be simulated using a CMYK combination. For all electronic uses of the logo, the color may be simulated using RGB combinations.

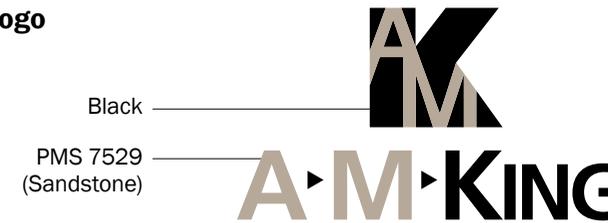

Sandstone

PMS 7529 – print usage
 CMYK – print usage:
 C-30% / M-30% / Y-38% / K-0%
 RGB – electronic usage:
 R-182 / G-169 / B-153

Black

CMYK – print usage:
 C-75% / M-68% / Y-67% / K-90%
 RGB – electronic usage:
 R-0 / G-0 / B-0

Full Color Logo

Clear Space

Minimum Size

Terminology

A M King is to appear as **A M King** only ever and on one line. To the right are examples that are not acceptable usage of the company name.
